God and the Existence of Evil (Theology in Public Book 2)

Evolutionary psychology is concerned with the adaptive problems early humans faced in ancestral human environments, the nature of psychological mechanisms natural selection shaped to deal with those ancient problems, and the ability of the resulting evolved psychological mechanisms to deal with the problems people face in the modern world. The evaluation of the possibilities and limitations of the cognitive and neurosciences is, however, not the only area that might conceivably profit from a study of the thought of antiquity; it should be also mentioned that many proponents of the religious faith in the immortality of the soul still see themselves as confronted by the same mysteries that were already recognized and studied by those who held analogous views in antiquity.
